Professional Summary

Currently pursuing an MCA with practical experience in backend development through academic and team based projects. Skilled in building scalable server side applications using Node.js, MySQL, and TypeScript. Familiar with designing RESTful APIs, deploying with Docker and AWS, and collaborating in Agile teams to deliver SaaS solutions. Proficient in optimizing backend performance and resolving scalability bottlenecks. Eager to apply and grow technical skills in real-world, fast paced environments.

Technical Skills

Languages: JavaScript, TypeScript, Java

Backend & Frameworks: Node.js, Express.js, Supabase, Firebase Auth

Databases: MySQL, PostgreSQL, MongoDB

DevOps & Tools: Docker, Git, GitHub Actions, Postman, Swagger (OpenAPI)

Cloud & Deployment: AWS (EC2, S3, ECS), Azure (Basics), Kubernetes (Intermediate), Vercel, Netlify, FileZilla

Frontend: React, Tailwind CSS, HTML, CSS

Others: Agile Development, RESTful APIs, API Design, WebSockets, JWT, CI/CD

Projects

MiteEat – Smart Canteen Platform | [Github](#)

Supabase, React.js, Tailwind CSS, Node.js

- Built a web-based canteen platform serving 250+ users with real-time food ordering and role-based access
- Integrated OTP login via Supabase for secure, passwordless authentication across 3 user roles
- Designed a staff dashboard to manage daily orders, inventory, and feedback submissions
- Implemented live order tracking and automated call notifications for order readiness
- Documented API endpoints using Postman and Swagger UI for consistent developer collaboration and testing
- Optimized for mobile responsiveness, improving UX and reducing average order time from 6 minutes to under 2

VedArogya – Ayurvedic Health & Wellness App | [Github](#)

React Native (Expo), NativeWind, JavaScript

- Built a mobile app delivering personalized Ayurvedic tips, remedies, and daily routines based on user inputs
- Designed a responsive, cross-platform UI using NativeWind for consistent Android and iOS experience
- Implemented an intuitive goal setting and progress tracking system that empowers users to build consistent Ayurvedic wellness routines, laying the foundation for personalized, habit forming experiences.
- Addressed a real world accessibility gap by simplifying wellness guidance for non tech savvy users
- Deployed via Expo with OTA updates, reducing manual testing and improving development speed by 30%

Internship

Manipal Skill Development Centre

Jun - Aug 2024

Full Stack Intern

- Led a team project to develop a web-based attendance tracking platform tailored for educational institutions
- Built intuitive front-end dashboards using React and managed backend data with PostgreSQL
- Deployed the application on AWS and hosted static assets using FileZilla and S3 for efficient access and scalability
- Integrated role-based access control for staff and admin users to manage student records securely
- Collaborated in an Agile setup, ensuring timely delivery and smooth communication across the team

Education

Mangalore Institute of Technology and Engineering (MITE)

2024 – Present

Master of Computer Applications (MCA)

CGPA (1st Semester): 7.4

Udupi Group of Institutions, Affiliated to Mangalore University

2021 – 2024

Bachelor of Computer Applications(BCA)

Percentage: 70

Certifications

- Prompt Engineering for ChatGPT – Vanderbilt University (Coursera), 2025
- AWS Cloud Practitioner (CLF-C02) – Udemy (Exam Pending), 2025
